

CULTURE & TOURISM

INTRODUCTION

Culture and tourism together create a beautiful journey of the heart and mind. Culture is the soul of a place—**its traditions, art, music, and way of life.** Tourism lets us experience this beauty first and, offering more than just sightseeing. It's about feeling the **rhythm of folk songs, tasting age-old recipes, walking through history, and connecting deeply with people and nature.** It's a return to simplicity—where stories are told through **dances, values** are passed down in festivals, and peace is found in the embrace of nature. In this journey, we don't just learn—**we feel, we grow, and we find a piece of ourselves.**
